

# My Solution on Assignment 2 - Problem 5

This is my Solution of Assignment 2 - Problem 5 from the Computer Science Course CS106A of Prof. Mehran Sahami at the STANFORD University.

[FindRange.java](#)

```
/*
 * File: FindRange.java
 * Name: Axel Werner
 * Section Leader:
 * -----
 * This file is the starter file for the FindRange problem.
 */

import acm.program.*;

public class FindRange extends ConsoleProgram {

    /**
     * Main Program to requests a list of integers from the user
     * to determine and report the min. + max. numbers in the list.
     *
     */
    public void run() {
        println("FindRange\n"+
                "=====\\n\\n" );

        println(   "Please enter a list of integer Numbers, one a
line,\\n" +
                    "or enter '" + SENTINEL + "' to finish the data
entry.\\n"   );

        input = readInt("?:");
        if(input==SENTINEL){
            /*
             * Special Case 2:
             * No values has been entered. Aborting Programm with
             * special note.
             */
            println("No Values has been entered. Aborting Programm.");
        } else {
            /*
             * Special Case 1:
             * Since this is the FIRST VALUE it is also the smallest
             * AND the largest entry so far i put it
             * to the Stats.
             * Background:
             */
        }
    }
}
```

```
* integer vars seem to get a "default value" of "ZERO"
when defined.
    * That makes is problematic when comparing with min and
max.
    */
max=input;
min=input;
while(    input != SENTINEL      ){
    if(input>max){
        max=input;
    }
    if (input<min) {
        min=input;
    }
    input = readInt(":");
}
println(    "Thanks!\n"      );
println(    "Smallest Number entered is: " + min      );
println(    "Largest Number entered is: " + max      );
}

private static final int SENTINEL = 0;

private int min;
private int max;
private int input;
}
```
