

# How to install Oracle Virtualbox 7 on Linux Mint 21 with automatic updates?

For some strange reason Oracle Virtualbox 7 is still not available through the Mint Repos in early 2024. And for some even more strange reasons Oracle themselves offer their own Debian/Ubuntu/Mint online (apt) repository, but seem NOT to make sure that people are using this method, so that users will receive future updates to the packages automatically. Oracle provides all the information for that, but it's unnecessarily spread out and not provided in a compact form, IMHO.

So for convenience i assembled all the details into one simple howto manual.

**This manual has been tested on Linux Mint 21 only.** However it may work with other Distros as well, It's on you to test and adapt.

## Installation and Setup:
